Oregon has already been labelled as one of the worst states to move to, but it is becoming a great state to move FROM. Your fight with Trump over sanctuary status is costing the citizens of Oregon, and that is a price you're willing to take but don't suffer from the consequences of your actions, however the people will. Now, with the loss of Federal Money you will put the squeeze on the citizens to make up the difference. You're literally giving people incentive not only to move out of state but discouraging anyone from moving here. Why would anyone want to come to a state with a stranglehold on the people through unfair taxation where WE do not have any say?
