you know its weird. i worked all my life. in Junior high school i started work and worked until recently when i hurt my leg really bad and had to have surgery. the ssi is lower now and ebt was almost taken away. what was promised to me all the years of working is i would be able to have ssi and live on it. you took it and took it now my ssi is 1000 dollars a month and 20 dollars ebt. have to beg for food at food banks etc. what kind of government in oregon is more about money and not about the people. sheesh
