Typical of government solutions, incompetence, when it cannot solve a problem rationally because group think does not end up with a rational outcome, the solution always ends up more money to waste at tax payer expense, which ,ironically, costs the same group more money to waste to cover already wasted money.. More taxes are evidence of a need for more rational leadership. There must be dozens of ways to cut waste, but leadership needs to be changed to cut those wastes. Anyone sane in charge, of course, could solve these issues without raising taxes, but that does not seem to be the case presently! MORE TAXES MEANS BAD LEADERSHIP DECREES BAD POLICIES. WE THE PEOPLE DESERVE BETTER LEADERSHIP NOT MORE TAXES.
