Committee: Joint Interim Committee On Transportation  
Funding

Measure, Appointment or  
Topic: LC 2

Hello. My name is Cindy Weinberg and I am a mother and a wife first and foremost, but then I am a laid off instructional assistant who lost my job because of budget cuts to our education system. Federal money should be given to education and students far before all of the other things that are being collected for taxes. Sanctuary cities should not even be a thing and even more than that the government is willing to give us money to help us, but they're not going to give it to people with miss use reputations on how to use their money. These taxes will kill my family, well obliterate any chance of getting ahead at all with my husband who is medically permanently, disabled, and unable to work and now I am at the mercy of the state, hoping that I will keep my house, but with these tax hikes, there is no chance I will ever succeed in getting ahead at all and maybe that's what is wanted here. I would love to believe that state in our country do not want people to lose their homes cars in Oregon's reputation because of ridiculous tax hikes that are unnecessary. Even the splash permit requirements now to play in water is ridiculous. This is supposed to be a state where people come here for vacations and have a good Time And people should be able to enjoy their time here if there are a resident or visitor and not be expected to pay such horrendous increases in taxing.
