Committee: Joint Interim Committee On Transportation
Funding

Measure, Appointment or
Topic: LC 2

I have been a resident of the State of Oregon for over 75 years, I cannot believe how we are being taxed out of our own State due to mostly mismanagement of funds..

When budgets aren't met it is decided -without- a vote to just implement another tax to Oregonians. We are already one of the highest taxed states on the map, who can afford to retire in Oregonian??

Certainly not Oregonians.

We have had increases on food, water, garbage, power, communications, transportation--and now you want to add another additional tax to our budgets that many are already struggling with to maintain everyday living with.. YES--we have to live within our budget, we can't go out and just add another tax to maintain living within our means. Have you thought about accountability for the budget they presently have.
