We as Oregonians cannot afford more tax increase. Some of us make decent money and barely get by as it is. I do not know how people are even surviving living in Oregon. Or is this the purpose push out people who or born and raised Oregonians who can't even afford it barely get by or have to move out of state because they cannot afford to retire here. What is your true purpose of your evil scheme. Younger generations can't even afford to buy a home let alone barely afford rent. And your housing solutions low income are not low income. The leadership in Oregon is destroying this beautiful state I have grown up in all my life. We can't afford any more cost burdens. It's bad enough we can't even enjoy playing in the water in floating tubes or paddle boards with out being burdened with more fees. This has got to stop.
