Topic: LC 2

Please do not add any taxes on us. We can not afford losing any more from our current personnel budgets. We have too make our money stretch as ODOT needs to stay in their budget and not just have us it's citizens bail them out. I would like to see an audit and see where the astounding amount of funds that they have are being spent. Instead of asking for more let's cut spending that does not make sense and get back to repairing and upgrading roads and lay off all the lucrative big projects that are not imperative. Let's confirm that there is no waste on DEI type issues. We want good roads and not pet projects that are not needed.
