

I think I speak for most Oregonians when I say we can not afford more taxes. You have taxed and taxed and taxed to the point of taking away our ability to live a life with our families. People can barely afford to put food on the table let alone enjoy the life that they are working for.

I get that you are trying to account for the lack of fuel taxes since you have pushed everyone to ditch the fuel vehicles and switch to EV, maybe you should have thought of what the impacts would be with this push. You can't throw this tax onto the people that are already paying these taxes, maybe you need to look for a new balanced way to account for EV.

If you push this tax you are going to see even more people flooding out of our great state. We are truly in God's Country but it's being ruined by more management and even worse agendas being pushed. It's time to take a look and realize that the current ways are not working, let's go back to the drawing board and find a new better way.
