Even having what's considered a decent income it really isn't in the state of Oregon. Now the threat of paying even more to live here in this beautiful state might push us out. The ones in charge of state budget and finance should be held accountable for how tax prayers money is handled. You can't have a horrible investor and give them now money to squander. You would fire them and find someone better. And as oregonians we deserve better. Cost of living is way more then national average. Gas tax is already one of the highest in the nation. The middle class is what keeps your state afloat and by attacking that is pure insanity. No more taxes!! Hold the state accountable for the terrible job they are doing. It's not the tax prayers fault for their terrible mistakes. NO MORE TAXES!!!!
