The idea of raising taxes in OR and the passage of the bill being advance to do so, will certainly impart the final death blow to an already failing State. And the way you choose to do it is obviously against the will of the people and represents incompetent; government at best. Don't you in government see that you have taken the state to the brink of being the least favorable state to live in .You have no concept of economics or history. I urge you to stop passage of this damaging tax increase bill, which was already defeated once.
