If Governor Kotek continues on the path that she appears to have chosen, the citizens of Oregon will be working only to pay taxes with nothing left to pay for anything else.! She's already managed to chase away Nordstrom, Penny's, May, Kohls, and many others with the absurd formulas used for taxing businesses. How does she propose to pay for all of her ill-conceived plans for all of the homeless (and jobless thanks to her efforts) that have become the population of our once thriving state?
