Hello,

I right this text today in opposition of the tax increase. Alone with all fees that are proposed to be raised.

As an Oregonian my hole life I can say that costs are already to high. Things are expensive enough. We are all paying our share in the taxes every year. Now this body purposes to raise our cost even higher. The real problem lies in that raising these costs or adding these taxes will have a very real impact on our lives and there is no foreseeable benefit. The state of Oregon needs financial accountability, not possible billions in new spending.

To close I, and my family firmly oppose all new taxes, raising taxes, or raising costs. Thank you.
