Committee: Joint Interim Committee On Transportation
Funding
Measure, Appointment or Topic: LC 2
TO: All members of the Oregon State Legislature
FROM: Michael Blanck
REFERENCE: Special Transportation Package Proposal Public Input

I am providing input about the proposed bill to express my sincere opposition to the fact that you would even consider this outlandish proposal at a time when the majority of the Oregon population is struggling just to get by month to month. In spite of the fact that our President has declared a big drop in inflation and energy costs, that certainly doesn't seem to be the case for Oregon. Why is that? Could it be our leadership and the way this state is managed. It always seems that when money gets tight, you people come with a solution that further increases costs to the hard working middle class that has always been the backbone of this state. Frankly, the people are all sick and tired of it. Here's an idea, let's trim the size of government, unnecessary government programs, and ridiculous regulations. As we all know there is a huge amount of waste, fraud and abuse in Oregon as this has already been proven to be the case in our Federal government. At least now we actually have a President that is willing to put an end to this corruption. You could all follow President Trump's example and turn this state around and make it the state we all once cherished and loved. As a life-long resident of Oregon, I used to be proud to say, "I'm an Oregonian". Now I am embarrassed to admit it. Let's get back to cleaning up our streets, parks, and forests to make Oregon a state to be admired. I can only pray that truth and justice will prevail in the end and I implore you to vote no on this proposal. Thank you for your consideration in this matter.
