

Submitter:	Craig Zanni
On Behalf Of:	my family and neighbors
Committee:	Joint Interim Committee On Transportation Funding
Measure, Appointment or Topic:	LC 2

The application of increased taxes and fees related to the current transportation costs is extremely damaging to those who work and live in area without public transportation. Those such as my children and grand children are required to drive some distances for work and to school both high school and college. These requested increases greatly increases the cost of getting to and from work, shopping along with making schooling cost increase dramatically. As you make transportations cost more unaffordable for those who are required to drive to employment and those who work at minimum wage jobs to support their continuing education, you create an incentive for those affected to look for work or schooling out of state. This has a very negative impact on all Oregonians and is specifically damaging to those live , work and try to learn in the less suburban areas of the state.

This is a very bad idea and was already turned down by the legislator earlier this year !!!!!!!!!.
