Funding

Measure, Appointment or
Topic: LC 2

Starting over since my previous testimony sent itself before I was finished. I am GRAVELY concerned about the proposed taxes and other fees proposed in this transportation bill. I am a Senior Citizen on a fixed income and already having a very difficult time affording my food, gas, utilities, not to mention when an appliance or my car needs repair. And Heaven help me if I need a new car given the extra taxes, registration fees etc. I'll pay then. I don't believe that any of you realize what a burden the gas tax already is - our gas prices are nearly the highest in the nation. And we already have high registration fees. I volunteer for a group that helps the "working poor" and believe me, there are plenty lined up to talk to us since they also are finding it difficult to pay for rent, transportation to work, food, child care and utilities. I hope you realize the votes you will lose. PLEASE VOTE NO on this terrible bill.

Respectfully,
Jane Monnette
