Funding

Measure, Appointment or
Topic: LC 2

Oregonians are NOT getting the return on investment they were promised. We are the taxed at a ridiculous rate and yet our state ranks in the bottom 10% in affordability, business friendliness, student test scores and graduation rates, groceries, fuel prices, and TRANSPORTATION. ODOT does not have a funding issues. The state of Oregon does not have a funding issue. We have a leadership and accountability issue. If you raise the taxes/fees/expenses, my family and I will just be another statistic that worse's the states image when we leave.
