Dear Tina Kotex I'm a Oregonian I see many truckers and work at a gas station . I live in the rural part of Oregon I voted against you when you ran cause your policies will turn out beautiful state Into California and the mess there governor has made in his own policies that match what your trying to pass in our state so I'm concerned. You wonder why all these people are leaving I will tell you why simply. We're choosing to live a state where minimum wage can not support ourselves and pay 1200 rent on top of utilities and pay your overpriced gas when we can get it cheaper far from here Idaho Texas and Florida have a great economy affordable for the working class let alone during winter time my roads are hazardous in winter without odot cleaning the roads during winter storms I'm afraid what comes people will not be able to safely travel on I-84 I watched it happen this last year personally semis passing someone who is cautious in these winter conditions fling of the side of a hill but you don't care . Your refusing to put Oregonian first over illegal immigrants who don't pay taxes who cheat the tax payers out of financial aid and government assistance housing we are are the people your to protect and uphold not non citizens . You can revise our sanctuary state policies and get the federal funding for our state but your asking to tax us more of instead of complying I don't want you in charge of hiring and firing ODOt head person I don't want it taken out the Oregonian choice because I see how your cities are ran compared to mine it's safer for us not to go on that side of the state your only hurting us your policies will make supply changes come to a halt you will drive us out . But one thing is just like California it will be burned down one day due to the neglect and due to the illegal who refuse to leave who burn down cities due to riots because of lunatics in governor offices all the way to council offices .
