Topic: LC 2

As a resident living on a fixed income the tax would greatly impact my ability to continue living in the state of Oregon with out using subsidies to survive month to month. Business will lose patrons who no longer can afford to shop at their shops, because the price of products will go up and this is no fault of tariffs, but the fault of mismanagement of our tax payers money. Families will no longer be able to sustain the daily life of just surviving to make ends meet. Ends will no meet. families will leave Oregon and there goes our future of our State.

Kotak made promises that she had no right or the money to make. Now she expects the people of Oregon to meet her promises. NO! No! we do not have the money to give even in taxes. Too vote this bill in would be a disaster to our state, economically and future prospect of business (big or small) to operate or consider staying or coming to the State of Oregon. If you belief that you will reap profits from this tax bill have been lied to. You will reap nothing. People and business will leave and the revenue will drop to nothing. When this state is empty there will be no jobs, no taxes, no tourist revenues, no nothing. JUST THE DEATH OF OREGON.
