Topic: LC 2

Dear Joint Interim Committee On Transportation;

During these most difficult economic times and belt tightening in our state, one can only imagine the devastating effects of more taxing of the people of Oregon. I am a senior, working home owner in Oregon and I say NO to this new funding bill it is not necessary. During this time of record amounts of revenue collections, the state of Oregon has got to work in the legislature for the people to use the money they have in their budget to effectively run this state. If that is not possible, and I know it is if both sides of the isle work together or step down as this is the job you are given. The times of rampant spending and using NGO's to filter money to support idealistic agendas has got to end. Thank you for your attention to this matter.
