Committee: Joint Interim Committee On Transportation
Funding

Measure, Appointment or
Topic: LC 2

Dear Legislators,

Please vote "NO" on any new taxation for transportation and special projects.

The majority of Oregonians are struggling under the high taxation rate that Oregon operates under, and adding additional taxation will damage what remains of our fragile economy while placing an unnecessary tax burden on working families and seniors on limited incomes. The tax system you all created (as taxes have continued to increase over the past few decades) is wasteful and not managed well. There needs to be an outside of Oregon audit on the spending to ensure Oregonians are getting what they pay for before one more cent of taxation is added to our household budgets.

Please vote "NO" to save jobs and help working families, seniors and people with disabilities to be able to afford their homes and living costs.
