NO NEW TAXES! This administration is suppose to be open and honest, yet we see that it is anything but. Governor Kotek's refusal to even look at the Republican sponsored fix for the road department is testament to that. We the people, demand that ODOT be audited. We the people, demand that the office of the Governor be audited and the respective information be made entirely public. No more hidden agenda items, or basement meetings, Governor Kotek ran on a platform of transparency in the Oregon state government. We the people, demand transparency and a full accounting of where every dollar goes!
