We don't need more taxes and increasing fees. Oregonians already are taxed at one of the highest levels in the country. ODOT and the state government needs to manage funds better and run our government more like a business. Cut out the unnecessary roles that don't support the core mission of ODOT. The republicans in the OR legislature have put forth ways to manage ODOT without raising taxes, this should be considered. Oregonians can't afford to keep paying more each and every year, we are already drowning in taxes and fees.
