Please stop the insanity. The state of Oregon is one of the top 5 states for taxation. The business climate is worsening, and the Democrats are proposing to more new taxes. Really? Perhaps we should find a way to begin cutting excessive spending for non-road/highway items. Sounds like we need to listen to the Republican group who are proposing to live within our means and cut out all non-necessary spending and focus on road maintenance and road repair. If I could move my business out of state, I would move immediately. We are making Oregon unlivable to high taxation.
