As an Oregon Resident and Veteran I am severely disappointed in the states Choice to add more taxes and fees to an already overtaxed state without the representation of the people goes directly against our American values and why we founded this country. The budget deficit needs to be met by spending cuts and balanced budgets. Furthermore we must focus on larger issues such as the drug crisis and homeless epidemic. In a time of such economic uncertainty now is not the time to raise taxes or put price our already struggling middle class families forcing them to move out of our beautiful state.
