Measure, Appointment or
Topic: LC 2

We are not getting the representation we deserve as the people who pay taxes for state employees and programs. The state has continued to unnecessarily grow the ranks of administration and management, rather than spending our money wisely and directly on programs, on-the-ground workers, and necessary projects for safety. Taxpayers are tired of your never ending need to ask for more without being accountable for waste and overspending. It's time to contract out, cut management ranks, and cut taxes, rather than raise them again. We can't afford any of this as a state.
