Topic: LC 2

It is NOT acceptable to add any additional fuel taxes, it is NOT acceptable to add any addition DMV costs, it is NOT acceptable to add any further payroll taxes and it is NOT acceptable to adjust fuel taxes without legislative consent.

I live in a rural area and my family lives in rural areas - we have to travel relatively far to visit each other and fuel is already a significant cost to simply commuting each day to work; I don't need for the high cost of fuel to make visiting my family too expensive. The roads have been safely maintained for years before adding bloat to your budgets so take the bloat out first instead of trying to get people to pay more for what already should have been prioritized. If the powers that be can't figure out how to prioritize funding to take care of the very core missions of the agencies then they shouldn't be in the positions they are in and someone else who knows how to prioritize should be brought in. Accountability is clearly lacking.

No new taxes and no new fees!
