Committee: Joint Interim Committee On Transportation
Funding

Measure, Appointment or
Topic: LC 2

These tax hikes, or fee increases, are going to further bankrupt our state and our workers. Oregon is already inhospitable to industry, which creates a strong economy and provides jobs for our tax payers. Folks are struggling right now just to put food on the table. The price of groceries and consumables is rising higher than our wage increases. We cannot afford this tax bill, not any part of it! The DMV fees and increases are out of sight now. Remember, we don't have such high fees at the DMV because of the steep property taxes! We are already paying. Our schools are among the worst in the nation. ODOT needs a major restructure, not restructured to just take in more funding.

We have already made our voices heard when this bill was presented during the regular session. The overwhelming majority was NO!

Do NOT pass this bill! It is making even middle class standing unattainable for a majority of our taxpayers. NO NO NO to this transportation bill funding.
