Topic: LC 2

No new taxes, surcharges, tolls or whatever way you think you can think of to extort money from us taxpayers and homeowners.

Here is a thought! Before you complete a budget, consider ODOT at the same time.

Obviously you overspent elsewhere. This last minute charade just cannot happen.

(Although it does appear to be by design).

One way ODOT can cut is with holding off on more bike lanes and just maintain what we presently have. My guess is percentage of usage is not reflected by the percentage of money going towards "bike lanes, etc".

NO NEW TAXES!!
