I am writing today out of frustration because I dont know what part of NO MORE TAXES you elected officials are not getting ? This state is going deeper into the hole and your drowning the taxpayers that are still staying in this state trying to keep afloat. This back door, we didnt get what we want conduct, has got to stop ! You've already ran businesses out of the state , taken ridiculous environmental extreme policies and shut down state forests and now the mismanagement of budgets and no accountability is being pushed onto us. Poverty , struggling to make ends meet and just not being able to afford to live somewhere affects everyone no matter what party your apart of. I hope that if this goes through, people in this State will wake up and realize this isn't the leadership we need! We need politicians that benefit the citizens not make their life worse. Please vote this down ! Its time for the Governor to step back, get the budget back in place and cut the fat at the top, not the vital workers actually doing the work!
