Topic: LC 2

I am totally opposed to this proposal, especially the part about granting ODOT the ability to increase gas taxes without legislative approval. This is simply throwing good money after bad. ODOT needs to manage the money they are given and stop wasting (and losing) that money. People simply cannot afford to have their taxes continually increased every year. As proof of that, I will refer to a listing of median personal income that I saw this morning where Oregon ranks 49 out of all 50 states. Miserable. Manage our state better than you do.
