Measure, Appointment or
Topic: LC 2

I oppose this transportation bill. Raising rates for registrations, titles, drivers licenses allowing gas tax increases without a vote or input from our elected officials is wrong. The raise in costs will cause food and products to rise because the costs to get products here will increase. Oregon is already one of the most expensive states to live in and if this transportation package passes I will have to move out of Oregon because I won't be able to afford to live here any longer. I have lived here my entire life and I am 70 years old.
