Topic: LC 2

I am stating my opposition to the proposed rate increases that are not associated with only electric vehicles. Tripling titling fees is ridiculous and excessive as are approximately doubling registration fees in all categories of vehicles. Also, why wait for 6 years to increase the use fee for electric vehicles, that should be implemented immediately. I have already objected to subsidizing the purchase price of EV's. EV drivers have already gotten a break, why are you coddling them further?

Also, using payroll taxes to fund city and county transportation projects is just wrong. You're taking unrelated money from the public to fund projects that in large part might be unused by most people. And you're doubling it at that. I remember thinking it was a bad idea when you implemented the tax a few years back and you're already doubling it.

The public is not the legislature's piggy bank to abuse when you cannot execute your duties using sound policy.

I'm fed up with increased taxation as it is, tax and spend is not the answer to all of our problems. Get your act together!
