Committee: Joint Interim Committee On Transportation  
Funding  
Measure, Appointment or Topic: LC 2

Dear Tina Kotek, and the rest of the Oregon legislature. I understand that you need funds to fix the roads, but I already pay taxes in Oregon, and I pay them to the federal government as well. Please do not raise the gas tax, the income tax, or any other tax for that matter. My wife and I are teachers, and have a limited income, which is already severely strained due to the high cost of living in the failed state called Oregon. As far as DMV fees are concerned, I would not like those raised either. Instead, I propose less benefits for the people who will not work, and using the new excess to fix the roads instead of giving my family's money to people on welfare and food stamps and other allotments like HUD.

Or what about this? I did not vote Democrat and do not agree with the way that they are leading our state into socialism/communism. I'm getting really sick and tired of having to work so hard to enjoy a less and less comfortable lifestyle while I watch my kids' downward spiral due to their jobs going to illegals and not paying enough anyhow. I do not agree with your "give everything away" politics to engender votes in your favor. How about we just stop being a sanctuary state and get back our federal funding? That makes the most sense, but of course, most Democrats have no sense. They think tax and spend, tax and spend, tax and spend until everyone is broken and the entire economy fails. Is that what's next? I truly hope not. If you would like to speak about this personally, please call me. My telephone number is 541-660-7583. I'm really excited to chat with somebody and try to convince them not to do these things that really will ruin our state, along with ruining everyone's quality of life, whether Democrat, or Republican.
