Dear public servants,

The money that is being collected currently from Oregonians hard earned paychecks is more than enough to support odot and all the other NECESSARY programs that the government is charged with maintaining. It seems that money needs to be better allocated and accounted for. Raising taxes and fees on an already strained public is not and will never be the answer. No new taxes! Use the money currently being collected responsibly and stop trying to extort more money from the people you were elected to serve.
