

Support for Governor Kotek's Transportation Bill

I urge you support this transportation bill:

1. Failure to adequately fund ODOT hurts the safety of all Oregonians who use our roads and bridges daily and during emergencies.
2. These funds are necessary for the re-investment in our transportation infrastructure. Higher fees and taxes to pay for this re-investment is a responsible way to ensure the well-being of the public as they travel the bridges and roads of our state.
3. Stable funding for ODOT projects is the best way to ensure effective project planning, implementation, and completion.
4. ODOT plays a critical role in public safety during emergency situations. Funding for emergency planning and preparation is money well spent.
5. I urge you support the well-being of all Oregonians by supporting Governor Kotek's Transportation Bill.

Sincerely,

Betty Harris
