ODOT August 29th Special Session

I do NOT support new taxes for ODOT until there are several changes in ODOT's money-wasting spending habits for DEI and large, extravagant projects that are run by former employees of the large companies that will build and profit from larger and larger projects.

I am outraged that ODOT threatened to lay off workers instead of fat cat administrators in an effort to garner support. Instead, their layoff threats are indictments against their corrupt spending practices of our tax dollars, with no results on improving our transportation systems.

I am a lifelong Democrat who will look to change to Republican representation so we will get appropriate value for our tax dollars.

Thank you, Senator Meek, for standing up to the tax tax tax government.
