

Submitter:	Fire Who Ordered Wrong Snow Plows
On Behalf Of:	Snow Plow Drivers Should not be Laid Off
Committee:	Joint Interim Committee On Transportation Funding
Measure, Appointment or Topic:	LC 2

You know those Snow Plows, aka "Governor Trucks" as someone likes to call them, who got a LayOff notice and is an ODOT Mechanic that will soon be charging a premium fee for independent repair services, it is very well known those hunks of junk will never be used on the roads because they were the wrong types bought for the terrains needed here.

Some administrative manager / union idiot paper pusher (probably a DEI hire) bought the wrong ones from Canada, normally used for airports, spending millions of dollars and they flipped over the 1st snowy day in use. But that office job isnt getting laid off, the guys who fix the broken vehicles are getting laid off. Did they get a kickback for buying those snow plows? Probably. Will they ever get laid off for their incompetence? Never.

The Director needs to get laid off. Top down, ODOT does not deserve a penny more of our taxes, and definitely needs a hiring freeze until there is a full audit / investigation.
