Topic: LC 2

I cannot believe the governor is trying to ram this tax increase through. She threatened the citizens of this state that she was going to layoff the blue-collar workers that provide the services the dept. of transportation is supposed to provide. She did not do anything to cut cost or waste on the administrative side. There needs to be a serious audit of where our money is going and why. There needs to be transparency to the public before any new taxes are levied. The fat and pet projects need to be cut. No on this massive Tax increase.
