There seems to be a vast disconnect between elected representatives and those that elect them. No new taxes! The funds that are available are what you have to use. No more taxes and fees. You are driving out business and hiding behind scare tactics. State and local government are creating this problem not the citizens. Overall the state is in need of leadership and budgeting. Creating politically motivated projects as they waste time money and the citizens pay the price for their incompetence. Oregonians have spoken time and again saying no to taxes. Reprioritize funds, eliminate waste or cut back on management and administration. Reevaluate pay charts for government employees or officials and put tax paying citizens first.

Respectfully,
