On Behalf Of:

Committee: Joint Interim Committee On Transportation  
Funding

Measure, Appointment or  
Topic: LC 2

I am deeply bothered by the proposed transportation funding package. I am a fifth generation Oregonian. My four children, 2 grown and flown, 2 at home in college, struggle to pay their most basic necessities. We have already seen continued rises in DMV fees and gas taxes, now this additional proposed increase is just unbearable. My husband and I worry daily about how our children are going to be able to stay in their home state with the steady increases in home prices, rental prices, and other fees and taxes. Before more fees and taxes are heaped upon Oregonians, I want to see an audit of ODOT and see where waste and frivolousness can be eliminated. I haven't seen the governor mention one word about this option. I find this disturbing. She should be working for the good of all Oregonians and safe guarding their hard-earned money.

Thank you,  
Cynthia Ross
