The current state of Oregon is a fat, corrupt failure. I sat in your town hall and hear the Democrats scream about how bad DJT is but the catastrophic miss management in this state rest solely in YOUR LAP! I hear bitching about whoa is me the timber industry died and we had to come together to save the day. You know why we can't log and produce a product for a profit? because Democrats killed it over an owl. Stating it can only live in old growth trees. That was a lie, the loggers proved it and Dems plowed a head anyways. Well I don't know if you have been outside but it's kinda hard for an owl to live when it's house is on fire! Congratulations you have the Midas touch when it comes to policy except everything you touch turns to shit. Ask the people of Detroit when their city burned down. Dems used that as a useful tragedy to try and pass more fees and taxes. Instead of logging it. Even though you failed, you did end up making a fire risk map. I had friends and family who finally could buy a house get their insurance dropped over that map. No apologies from Fahey over that. Speaking of how hard it is to buy a home. You stole 15 million tax payer dollars for illegal immigrants home down payment! You also stole 15 million dollars for legal representation for ILLEGALS. There's not a single tax or fee increase Democrats do not like. Portland ranks number one for the most expensive city in the country. Guess what that buys you? Carjackings and homelessness, Good investment. Democrats are taking any shortage of core service to raise taxes to restore those services and then siphon those new funds off to other projects without fully funding the reason for the fee or tax increase in the first place. This secret transportation bill will be no different. This is HB 2025 in a trench coat. Kotex knows it, Wagner knows it, Fahey knows it. You're spoiled little children. We the people have had ENOUGH and your reign of terror will come to an end. Signed a very disappointed Oregonian man.
