Let me just go on record as saying there should be no new taxes on Oregonians period. The state and ODOT in particular are so mismanaged why not focus on fixing the problem?

Instead the governor's office needs to call a special session just to push this because she didn't get what she wanted during the regular session. Let's start fixing the bloat and spending that have been wasted before even suggesting raising taxes. The government exists to work for the people not the other way around.
