Dear Legislators,

Instead of figuring out ways to spend more of our personally earned dollars of which you have so many of right now I have another suggestion. I would like you to consider put an end to the mail in balloting system as a way to regain the trust of all Oregonians. We have no Republic, no democracy without the people feeling confidence in elections. How about you make that your goal with this special session instead of finding ways to make life harder for the working guy. There is a long list of changes that can be done to give the elections back to Oregonians.

That is what this disenfranchised voter would like to see you do. Clean up the voting process. Not overtax us.

NO to your original purpose for the Special Session. Okay to changing its purpose to giving Oregonians confidence in honest elections.
