No new tax's hikes, stop using ODOT as a threat or hostage to get your way. Go back and do better. You layoff 500 employees off you're putting the hole State in jeopardy with the first storm that comes in this winter, raising income tax by 50% you're going to cause more homeless than domino effect to more people on assistance, or people and business leaving. If you raise gas taxes it will cause great hard ship to many Oregonians trying to get to work, and so on. You're punishing those of us who have the freedom to choose to drive a gas vehicle. Plus, double taxation to those who Choies to drive hybrid vehicles. If my car gets 25 mpg and I have to pay 55 cents per gallon for state tax's the every 25 miles EV goes they should pay .55 cents every 25 miles driven, then you should tax's their vehicle because of the weight, and being much heavier than a gas vehicles than cause more road and bridge damage, When the battier has to be replaced where are you going to dispose of it in the landfill an destroy the ground & water table. You are taxiing Oregon out of business. You're turning Oregon into socialist state.
