Vote no on HB2025.

Oregon is less affordable everyday. Our priorities need re-assessed. Why are we funding pet projects over state employees?

Raising taxes in gas, registration, tolls, title fees, and payroll will crush the families struggling to recover from over 10% inflation. Payroll for private employees did not see 10% increases and now we are faced with it from our own state.

Stop funding climate initiatives. Stop funding illegal immigration. Cover necessary expenses first and redirect odot to support maintenance and safety. My county is spending \$7.5 million on one roundabout! The cost of these projects are out of control and we need to consider costs before feelings and ideologies.
