Measure, Appointment or Topic: LC 2

I urge every one of you reps to vote this idiotic gas tax down . We are one of the highest gas price in the country. There was already a gas tax last year,so there doesn't need to be another. This is just outrageous every time we turn around in this state that corrupt kotek thinks she can raise whatever she wants. Also a tax like that has to go to the voters which isn't being done. Another sneaky trick of hers You all were voted in to your position to represent the people, so it's time that you do your jobs. People can't keep bailing out these agencies when they claim they are broke. Well I just read that there is money in ODOT without raising taxes. So guess who's lying again.. Taxpayers are tired of the corruption and lies in this state. We've had enough. There should be no question here to stop this session bills dead in the tracks one and for all. Quit wasting our money when this was decided No in the last session. Just because this governor doesn't get her way, you do it all over again which is completely a waste of more money. This damn state needs new leadership and get new officials who know how to govern a state with a budget. Not just throwing money to DEI projects and giving illegals benefits for everything food , medical benefits, free housing. If all that was put towards where it should go ,there wouldn't be this problem all the time. This legislative
On needs to stand up for us and just say NO More TAXES Period. You can't keep taxing with no representation and you all are turning this state into a scam bag California state.
