Measure, Appointment or
Topic: LC 2

My name is Larry Weber and I am an 81 year old Native Oregonian born in Historic Oregon City. I am a retired Oregon Public School Administrator & Professor of Education at George Fox University. I have watched over the past several years as Our State Tax Dollars have been moved from essential services such as State Police, ODOT, and Public Education into Social Services. in many instances New Social Service Agencies were created and expanded thus taking dollars away from essential services. These dollars seem to enable instead of moving people off of public support and they have created layers of State Buracracy. I am APPOSED to any ODOT solution that raises the current Oregon State Tax Burden on Individual Tax payers. I believe an External Auditor should examine every State Agency for Waste, Fruad and Abuse and funds restore to essential services such as ODOT. Thank You! Larry D.Weber
