Hello,

The Interstate bridge and the lane expansion for the Moda Center area in Portland are too expensive and expensive. Why not re enforce the bridge foundations as Vancouver BC has done with some of their bridges to save cost ? Why aren't we using tolling to reduce traffic ?

If the federal government has withdrawn \$450 million for the Moda Center lane expansion, why is ODOT still pushing ahead ? This is foolish when there is so much that needs to be state wide for road maintenance and repair.

We need better leadership in government.

Thank you
