On Behalf Of:  
Committee: Joint Interim Committee On Transportation  
Funding  
Measure, Appointment or Topic: LC 2

Good morning,

My name is Monique Bochsler. Excuse my late testimony. I suffered a stroke last Monday and even so I knew it was so important to focus my brain and write this testimony. It will not be the best worsened testimony but it will be from the heart. I'm writing in regards and against this special session.

I find that in the name of saving money, you call this session, that cost us money.

Why would we need more taxes in an economy that is struggling with over taxation. We have been taxed over and over again with the promises that things will be fix. But this doesn't happen. This last session we spend how many hours of endless, pointless bills being carelessly stuffed down the line. If this was so important, why did we save it for the very last week of session. Why did we sneak it in. If it was so important, that how we must call a special session. Seems to me that some of the pointless bills should have t took a back seat.

Using critical thinking and common sense, there is only one reason this has been brought up. It's another way to tax the people to cover the asses of over spending of the current administration. Federal government has said enough, so our governor has called it upon herself to inflect the extra cost on the people.

How is this helping Oregon? We are just digging deeper and deeper into a place we don't want.

I also don't appreciate the branches of legislation trying to cover for such action. We the people voted you in to speak for the people. And this is not what we want. We want you to stand on your promises to make Oregon better.

We all united in denying this during session. I beg we can do this again.

Thank you so much for your time. And thank you for over seeing the grammatical errors. But this was to important for me not to speak up. I have spent many hours writing testimony this year. Not looking at political standings on the bills, but what I felt is good for Oregon. I pray you all will do the same.

Sincerely and with love

Mo
