I am against HB 2025 and adamantly oppose all the nonsense that is in this bill! It will increase costs not only to individuals that have to pay outrageous and higher fees on vehicles and gas, but will also impact the prices we have to pay when we go shopping for groceries and any other store bought goods. As the increase in fees and gas will be added to the cost of every item we buy at the store. This bill was killed in the last session and should not even be considered. VOTE NO ON HB 2025!!!!
